CVM Attending:

Current Track/Species Focus:

Planned/Scheduled NALE Test Date:

1. (JUST FOR FUN!) You are presented with Henry. He is a 14-year, NM, lab retriever mix for coughing. He weighs 70lbs. The clinician on the case feels the cough is suggestive for kennel cough. The clinician has decided to prescribe Doxycycline at 10mg/kg twice daily for 10 days. How many mgs would Henry need for each dose administered?
2. What has been one of the biggest obstacles you have overcome while being in veterinary school?
3. What do you feel is the biggest thing issue we currently face in veterinary medicine? How could you contribute to improvement?
