

Veterinary Technician National License Exam Application

Full Name:

Pronouns:

Age:

Email:

IG (If any):

Year of Graduation:

Technician School Attending:

Current Track/Species Focus:

Planned/Scheduled VTNE Test Date:

1. (JUST FOR FUN!) You are presented with Murphy. He is a 7-year, NM, Rottweiler for chronic diarrhea. He is up to date on all vaccines and current on heartworm, flea, and tick prevention. His diarrhea is straight liquid. He weighs 115lbs. The clinician on the case wants him to undergo IV fluid therapy at 2.5x maintenance for the first 24 hours. If using a 50mL/kg/day maintenance rate, what fluid rate would Murphy's pump be set to deliver the requested fluids for the day?
2. What has been one of the biggest obstacles you have overcome while being in technician school?
3. What do you feel is the biggest thing issue we currently face in veterinary medicine? How could you contribute to improvement?
